

Proyecto- el árbol de familia

You are going to create a family tree using Spanish vocabulary from Episode 11. You can use your real family, make up a family, or use a celebrity family. Be sure to include the following requirements:

- A colorful, visual family tree that identifies at least 10 family members and yourself in Spanish.
- Each family member should be labeled with their relation to you in Spanish (i.e. mi abuela, mi padre, etc.)
- A printed or hand-drawn picture of each family member. You will not have access to a color printer at school, so anything printed needs to be brought in from home.
- Two sentences to describe each family member. One sentence should identify your relationship to the person and one sentence should tell the family member's name. These sentences will be typed and submitted in Google Classroom during class.
